RESEARCH INTERESTS

I am interested in **natural language processing** and **multimodal artificial intelligence**, with the long-term goal of building **personalized conversational agents** that can remember, understand, and adapt to users across long-term interactions. My research focuses on enabling conversational agents to continuously maintain and update **user-specific information** from dialogue and behavioral signals, supporting more consistent, context-aware, and personalized interactions. I am also open to related research directions that advance **adaptive and human-centered AI**.

My current research interests include:

- **Long-term and memory-aware dialogue systems**
- **Persona-aware conversational recommender systems**
- **Agentic memory management and persona updating**
- **Multimodal conversational agents and LLM-based personalization**

EDUCATION

Korea University Sep. 2025 – Present
M.S. in Computer Science Seoul, Korea
- **Advisor**: Prof. Buru Chang

Sogang University Mar. 2020 – Aug. 2025
B.A. in Chinese Culture; B.S. in Mathematics; B.Eng. in Big Data Science (Triple Major) Seoul, Korea

Busan International High School Mar. 2016 – Feb. 2019
Chinese and International Politics Busan, Korea

PUBLICATIONS

[*] *Equal contribution,* [†] *Corresponding author*

[EMNLP 2026 Main Conference] TRACE: A Long-Term Conversational Recommendation Dataset with Evolving User Personas
Jihyung Ahn[*], Seonah Han[*], **Chanho Park[*]**, Hyeongwoo Im, Daeyeong Kim, Subin Kim, and Buru Chang[†].

[ACL 2025 Main Conference] SHARE: Shared Memory-Aware Open-Domain Long-Term Dialogue Dataset Constructed from Movie Script
Eunwon Kim[*], **Chanho Park[*]**, and Buru Chang[†].

EXPERIENCE

Language & Intelligence Lab (LiLab), Korea University Mar. 2025 – Present
Research Intern / M.S. Student, advised by Prof. Buru Chang Seoul, Korea
- Research **memory-updating agents for conversational recommender systems** that track evolving preferences across sessions
- Design **agentic memory management** for extracting, retrieving, and revising long-term user memories
- Develop **persona-aware and multimodal dialogue systems** for personalized interaction

Language and Data Intelligence Lab (LDI Lab), Sogang University Mar. 2024 – Feb. 2025
Research Intern, advised by Prof. Buru Chang Seoul, Korea

- Studied persona-aware open-domain dialogue and constructed long-term conversational datasets
- Developed shared-memory modeling, persona extraction, and multi-session dialogue evaluation pipelines
- Co-authored **SHARE**, accepted at the **ACL 2025 Main Conference**

PROJECTS

Long-Term Conversational Recommendation with Memory-Updating Agents Nov. 2025 – Present

- Led the end-to-end design and implementation of the **KU-KT AI Center** long-term CRS project
- Built a **long-term CRS framework** that outperformed established multi-session recommendation baselines
- Developed a **memory-updating agent** for maintaining behavioral and dialogue personas across sessions
- Designed quantitative diversity evaluation, demonstrating higher dataset diversity than prior CRS benchmarks
- The work resulted in **TRACE** at **EMNLP 2026**

Persona-Aware Long-Term Dialogue with Shared Memories Sep. 2024 – Mar. 2025

- Collaborated with **Smilegate AI Center** on long-term dialogue grounded in shared speaker experiences
- Designed a **memory-aware dialogue framework** for modeling speaker-specific shared experiences
- Constructed the dialogue dataset and implemented memory extraction and update logic
- Fine-tuned language models for memory-aware response generation; the work resulted in **SHARE** at **ACL 2025**
